HASHEM MASHAL

Product Owner | Business Analyst

Cairo, Egypt | +20 1007243417 | hashemmashal22@gmail.com | Hashem Mashal | LinkedIn

SUMMARY

Software Engineering graduate with hands-on experience in Business Analysis, Product Ownership, Software Testing, Atlassian Solutioning, and AI for Business. Skilled in requirements elicitation, stakeholder analysis, process modeling, backlog management, user stories, acceptance criteria, and solution validation across the SDLC. Experienced in Jira, Confluence, JSM, SQL, Python, and data analysis, with strong analytical and cross-functional collaboration skills bridging business needs and technical delivery.

EDUCATION

B.A. in Computers and Information Sciences – Software Engineering | Mansoura University | 2025 Graduation

Graduation Project: Sanus – Healthcare Web Application | Grade: A+

EXPERIENCE

AI for Business Intern — NTI | *Cairo, Egypt* **2026 – Present**

- Gaining hands-on experience in AI for Business, covering data analysis, Python programming for data science, machine learning, deep learning, and business-focused AI applications.
- Working with supervised and unsupervised learning, model selection and evaluation, neural networks, CNNs, RNNs, and machine learning model deployment.
- Applying technical concepts through hands-on assignments, business case studies, and project-based learning focused on solving real-world business problems using AI.

Business Analyst Intern — Na3ml | *Remote, Egypt* **2026 – Present**

- Developing hands-on Business Analysis skills through a project-based training program covering the BA lifecycle from project discovery and requirements elicitation through analysis, documentation, and solution validation.
- Applying stakeholder analysis, requirements elicitation, AS-IS / TO-BE process analysis, verification and validation, and structured requirements documentation.
- Preparing practical BA artifacts including Stakeholder maps, Meeting Minutes, BRDs, SRS documents, user stories, and product backlogs.
- Building technical Business Analysis knowledge across SQL, APIs, data mapping, and AI-related concepts, culminating in an end-to-end case study and presentation.

Atlassian Solutions Engineer Intern — VidsCola | *Hybrid* **2026**

- Gained hands-on experience within the Solutions Pre-Sales function, applying Jira, Confluence, and Jira Service Management in a real-world Atlassian ecosystem to support customer-facing solutioning.
- Supported the configuration and demonstration of Jira projects, issue types, boards, workflows, and Confluence spaces to reflect client business processes and requirements.
- Translated stakeholder and business needs into structured Jira backlogs, workflows, and supporting documentation for solution walkthroughs and client presentations.
- Collaborated with senior pre-sales consultants in preparing solution demonstrations, process documentation, and customer-facing materials.

Tools: Jira | Confluence | Jira Service Management

Software Tester — Freelance **2025 – 2026**

- Performed end-to-end manual testing for web and mobile applications, covering functional, regression, smoke, sanity, and exploratory testing across core business workflows.
- Reviewed BRDs, user stories, and change requests to identify requirement gaps, define test coverage, and translate business requirements into effective test scenarios and test cases.
- Validated user roles, permissions, and access controls through RBAC, SoD, authorization, and access-control testing.
- Managed the defect lifecycle, including defect reporting, tracking, retesting, and support during triage & resolution activities.
- Supported UAT and release validation, working with business users to verify that delivered functionality met expected requirements.

Tools: Jira | Microsoft Excel

PROJECTS

TrackFlow — E-Commerce Delivery & Shipment Tracking Platform

Self-Initiated Case Study | E-Commerce Logistics Domain

- Defined the product vision, MVP scope, and functional/non-functional requirements for a shipment tracking platform focused on improving delivery transparency.
- Performed stakeholder analysis and modeled AS-IS and TO-BE workflows using BPMN and UML to identify process gaps and represent system actors.
- Structured and prioritized the product backlog into epics, user stories, and acceptance criteria using MoSCoW, RICE, and Pareto Analysis.
- Designed customer journey flows and low-fidelity wireframes, and defined KPIs and SLAs such as on-time delivery rate to support performance monitoring.

Sanus — AI-Based Healthcare Risk Assessment Platform

Graduation Project | Healthcare Technology Domain

- Contributed to the business analysis, front-end development, and testing of a healthcare web application focused on stroke-risk awareness and personalized recommendations.
- Conducted requirements elicitation and documented functional and non-functional requirements covering usability, performance, and data protection.
- Structured product epics and backlog items, translated requirements into test scenarios and test cases, and performed manual testing to validate functionality and data accuracy.

SKILLS & TOOLS

Product & Business Analysis: Requirements Elicitation | Stakeholder Analysis & RACI Matrix | BRD & SRS Documentation | Functional & Non-Functional Requirements | User Stories & Acceptance Criteria | AS-IS / TO-BE Analysis | Gap Analysis | Process Mapping | BPMN & UML | Product Backlog Management | Prioritization Techniques: MoSCoW, RICE, Pareto Analysis | MVP Definition | KPI & SLA Definition | Requirements Traceability | UAT Support

Software Testing & Quality: Manual Testing | Functional, Regression, Smoke & Exploratory Testing | Test Case Design & Execution | Defect Lifecycle Management | RBAC & Access Control Testing | SoD Validation | Requirements Validation

Technical & Data: Python | SQL | Data Analysis | AI & Machine Learning Fundamentals | Model Evaluation | API Fundamentals | Data Mapping

Tools & Methodologies: Jira | Confluence | Jira Service Management | Figma | Draw.io | Miro | Notion | Visily | Microsoft Excel | Agile (Scrum) | Waterfall | SDLC | STLC

Core Competencies: Cross-Functional Collaboration | Analytical Thinking | Problem Solving

CERTIFICATIONS & TRAINING

- Business Analyst Certification — Agile Enterprise Coach, London, 2026
- Atlassian Essentials Internship — VidsCola, 2026
- Practical Training for Product Owners — Udemy, 2025
- Agile Project Management — Coursera, 2025
- ISTQB Foundation Level (CTFL) Training, 2024
- Junior Penetration Tester (eJPT) — Netriders, 2024
- Full Stack Development — Consultant of Computers & Information Center (CCIC), 2023
